API credential custody - reference annex

CURRENT REFERENCE; named scope only

Controlling reference for api credential custody. Credential validity belongs to the custody guide. Audit retention belongs to the security records schedule.

The security records schedule retains emergency revocation audit entries for 180 days; the key-management guide does not set a records lifetime.

Apply only the activity and conditions named in this annex. An operational guide cannot be used to invent an absent commercial rate, compensation clause or retention term. Where an entity-specific negotiated term is requested, the general policy is not sufficient evidence.
