Family leave case management - historical edition

ARCHIVED 2024; superseded

ARCHIVED, SUPERSEDED: this 2024 edition is retained for historical record only and is not the current operating policy.

The withdrawn 2024 family leave case policy approved six paid weeks for adoption placement.

The old edition covered the same operating activity. Its prior timing must not be treated as a forecast. Historic case records show how approvals were documented at the time; they do not authorise new work under that edition.

Family leave case management - historical edition

ARCHIVED 2024; superseded

Historical route register. These entries are examples of administrative queues in the retired edition, not current forms.

Registry PAR-1036: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry PAR-1047: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry PAR-1058: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry PAR-1069: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry PAR-1080: record the request in the pending owner-verification queue; this entry is not the named exception route.
