Rail travel reservations - historical edition

ARCHIVED 2024; superseded

ARCHIVED, SUPERSEDED: this 2024 edition is retained for historical record only and is not the current operating policy.

The archived 2024 rail travel rule required exchange requests two hours before departure.

The old edition covered the same operating activity. Its prior timing must not be treated as a forecast. Historic case records show how approvals were documented at the time; they do not authorise new work under that edition.

Rail travel reservations - historical edition

ARCHIVED 2024; superseded

Historical route register. These entries are examples of administrative queues in the retired edition, not current forms.

Registry RAIL-337: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry RAIL-348: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry RAIL-359: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry RAIL-370: record the request in the pending owner-verification queue; this entry is not the named exception route.

Registry RAIL-381: record the request in the pending owner-verification queue; this entry is not the named exception route.
