Research dataset custody - reference annex

CURRENT REFERENCE; named scope only

Controlling reference for research dataset custody. Export labels do not define study statistics. Key custody is addressed in the study security annex.

The study security annex keeps the reidentification key in the restricted key vault; the export guide does not identify the key location.

Apply only the activity and conditions named in this annex. An operational guide cannot be used to invent an absent commercial rate, compensation clause or retention term. Where an entity-specific negotiated term is requested, the general policy is not sufficient evidence.
