Retail accessory warranties - historical edition

ARCHIVED 2024; superseded

ARCHIVED, SUPERSEDED: this 2024 edition is retained for historical record only and is not the current operating policy.

The archived 2024 accessory policy used a five-calendar-day inspection update deadline.

The old edition covered the same operating activity. Its prior timing must not be treated as a forecast. Historic case records show how approvals were documented at the time; they do not authorise new work under that edition.

Retail accessory warranties - historical edition

ARCHIVED 2024; superseded

Historical route register. These entries are examples of administrative queues in the retired edition, not current forms.

Registry RET-468: record the request in the pending owner-verification queue; this entry is not the named exception route.
